“We have used Scrabble for some time for thought provoking and mind stimulating activities. It is a proven fact that board games such as Scrabble are very beneficial to residents to slow the progression of the disease.”

- Rush University Medical Center  
Alzheimer Disease Center

“Mentally stimulating activities such as games play a useful role alongside medication in improving the cognitive function of Alzheimer’s patients”

- University of Pittsburgh Medical Center

“Progression of Alzheimer can be slowed down by playing different word games”

- Professor Andrew Carle  
George Mason University
